

VISIT SAP AT THE 2010 P&C INSURANCE TECHNOLOGY CONFERENCE

Visit the SAP booth for your chance to win an iPod, learn how to leverage Industry Value Accelerators, and hear how insurance companies are integrating claims and policy with document management.

SAP is a Platinum Sponsor at the Insurance Canada **2010 P&C Insurance Technology Conference** in Toronto on February 22, 2010. We invite you to visit us at Booth #17 to learn how insurance companies are leveraging Business Intelligence Industry Value Accelerators (IVA) such as the Solvency II and Claims Optimizer to create streamlined reports.

In addition, hear from SAP expert Steve Hancock as he presents "*The Integrated Office: How Insurance Companies are Integrating Claims and Policy with Document Management.*"

Accelerate Time-to-Value with Industry Value Accelerators

SAP BusinessObjects solutions that support insurance claims include industry-specific implementation accelerators – such as data models, pre-defined dashboards, and implementation guides – that empower you to maximize the success of your solution deployment, speed time-to-value, and mitigate project risk.

Visit our booth to learn how your company can leverage your existing systems to develop an integrated platform for claims, policy and document management – one that maximizes the deployment success of new solutions, speeds time-to-value and mitigates project risk.

Creating the Integrated Office

SAP also invites you to attend the SAP presentation "*The Integrated Office: How Insurance Companies are Integrating Claims and Policy with Document Management.*"

In this talk, Steve Hancock, Insurance Industry Principal, SAP North America, will discuss the ideal insurance environment – one that provides integration of claims and policy with document management.

By leveraging integrated processes and technology, insurance companies have the potential to streamline both their front and backoffice for a single integrated platform that lowers costs and increases cross-marketing opportunities. Head offices can benefit from cost reductions and the brokerage community can benefit from streamlined reporting and up selling opportunities.

SAP will also highlight key customers in North American who are benefiting from an integrated and streamlined environment in this presentation.

Visit SAP at Booth #17

After the presentation, be sure to visit the SAP booth for more information on SAP BusinessObjects solutions for the insurance industry and for your chance to enter a draw to win an iPod!

You can learn more about the 2010 P&C Insurance Technology Conference and view the day's full agenda by visiting the [conference website](#).
